

# Betta Owner's Manual

## Keeping your betta happy

Bettas are intelligent, playful, curious & full of personality. They love to interact with you, so why not teach them a trick or two! Look up **#bettaolympics** **#bettabonding** on instagram & see it for yourself!

Your betta needs clean water to thrive, the same way we need clean air to breathe. The key to keeping them happy is simply to give them enough space, clean water, live plants, a good variety of food & some human love. That is all!

## Food

Feed a small amount  
2x a day!

- Betta pellets
- Granules
- Bloodworms
- Brine shrimps
- Daphnia
- Flakes

**⚠ DO NOT OVERFEED BETTA!!!**

## Weekly water change

You should replace at least 40% of the tank water weekly. Remember to use water conditioner / dechlorinator to neutralise the chlorine & chloramine present in tap water.

## Acclimatisation process
